**Subject:** RE: Response to bypass request (UNCLASSIFIED)

Classification: UNCLASSIFIED  
Caveats: NONE

Stef -

The letter authorizes us to discharge from Sedimentation Basin #2 at Georgetown. Our request was for authorization for one discreet discharge from each of the two sedimentation basins - basin #1 and basin #2 - at Georgetown.

It is our intention to discharge basin #1 first, clean it thoroughly, getting all of the residuals that could not be reached by the dredge, then discharge basin #2 using basin the cleaned basin #1 to supply water to the McMillan WTP. That will give us time to discharge the larger basin #2, containing a greater quantity of residuals slowly without impacting the McMillan plant production.

I don't know if the authorization to discharge basin #2 only was intentional or an oversight.

I am at home today but you can reach me by email. I will be in the office all day tomorrow and can be reached by email or by phone at 202-764-2639.

Thank you.

Patty Gamby

Subject: [EXTERNAL] Response to bypass request

All: Attached please find EPA's response to the Washington Aqueduct's request for approval of an anticipated bypass pursuant to Part II, Section B, Paragraph 3 of its NPDES Permit No. DC0000019 and 40 CFR 122.41(m).

I have re-reviewed the original letter agreement among the U.S. Park Service, the USFWS, the NMFS, EPA, and the Corps. I do not believe the letter agreement, which primarily addresses the FFCA and permit re-issuance, requires notice to the signatory agencies. EPA will notify the DC DOE.

Please feel free to contact me if you have any questions. A hard copy will follow.

Sincerely,

Stefania D. Shamet

Senior Assistant Regional Counsel

USEPA Region III
